

Data Model for Document Storage

One document per article is created with the following schema:

```
{
  _id: ObjectId(...),
  title: 'article title',
  content: 'article content',
  categories: [category1, category2, category3],
  links: [link1, link2, link3, link4],
  words: [
    {
      word: 'word1',
      frequency: 'n'
    },
    {
      word: 'word2',
      frequency: 'm'
    }
  ],
  coordinates: [
    {
      lat: 'latitude1',
      lon: 'longitude1'
    },
    {
      lat: 'latitude2',
      lon: 'longitude2'
    }
  ]
}
```
